How to Use the IACR Communications in Cryptology Class

A Template

Joppe W. Bos[a, 1] and Kevin S. McCurley[2]

[1] NXP Semiconductors, Leuven, Belgium
[2] Self

Abstract. The abstract goes here. You may use mathematics and macros in your abstract, but do not use `\cite` or footnotes. The abstract should be self-contained.

Keywords: Dirac δ function · unit impulse

1 Introduction

This is the template showing how to use the IACR Communications in Cryptology LaTeX class. See the "How to Use the IACR Communications in Cryptology Class" for more details.

2 Bibliography

Citing papers is done in the usual way using BibTeX or `biblatex` commands. For example: the RSA paper [RSA78].

It is highly encouraged to use CyptoBib from `https://cryptobib.di.ens.fr`
